MILK PRICE HIGHLIGHTS

Class I prices: Early July prices paid by dealers for milk used for fluid purposes (Class I) averaged \$7.11 per hundredweight for about 150 markets, according to the Crop Reporting Board. This was the same as June and 21 cents above a year earlier. All regional averages were above a year earlier, with increases ranging from 13 cents in the West South Central to 30 cents in the East North Central.

Store milk prices: Store prices to consumers in 25 major cities in early July averaged 57.9 cents per half gallon for the most common grade of whole milk. This was down 0.1 cent from June but 0.5 cent above July 1970.

Home-delivered prices: Home-delivered milk averaged 67.3 cents per half gallon in July for 25 major cities. This was up 0.5 cent from June and 2.6 cents above July 1970. Home-delivered prices represent list prices before deduction for quantity and other discounts.

SALES OF FLUID DAIRY PRODUCTS AND RECEIPTS
OF MILK FROM PRODUCERS

Preliminary May sales: Preliminary May data on total sales of fluid dairy products in 63 marketing areas averaged about 1 percent above a year earlier.

April sales: Revised April sales of fluid products in 63 regulated markets (58 Federal 5 State) averaged 1 percent above the 3.4 billion pounds a year earlier.

Whole milk sales during April were down over 1 percent from the 2.6 billion pounds in April 1970.

Low-fat and skim milk sales for April 1971 were up 10 percent from the year earlier total of 711 million pounds.

Milk and cream mixtures sales (mostly half and half) were nearly 7 percent below the 1970 level of 36 million pounds.

Milk receipts: May receipts of milk from producers at plants regulated for 64 markets (60 Federal and 4 State) were up nearly 4 percent from a year earlier. The number of producers delivering milk to plants for the same markets was down 1 percent from May 1970.

Milk production: June 1971 milk production for the United States was estimated at 10.84 billion pounds, 0.4 percent more than a year earlier. Output for June provided 1.74 pounds of milk per person daily for all uses, compared with 1.75 pounds last month and 1.75 pounds in June 1970. Production during the first half of 1971 was 0.9 percent more than a year earlier.

1/ Regional and U. S. average based on prices for individual markets weighted by population. Prices are f.o.b. cities within markets on a 3.5% fat basis. Prices for Federal-order markets include over-order payments above minimum Class I prices, reported by principal producers' associations. Over-order payments may not apply to all Class I milk. Prices in this table do not represent returns to producers. Blend prices paid to producers, based on proportions used in fluid and manufactured products, are shown by markets in Table 6.

Class I prices: Early August prices paid by dealers for milk used for fluid purposes (Class I) averaged \$7.11 per hundredweight for about 150 markets, according to the Crop Reporting Board. This was the same as July, but 21 cents above a year earlier. All regions showed gains over a year earlier, with increases ranging from 8 cents in the Mountain region to 30 cents in the East North Central.

Store milk prices: Store prices to consumers in 25 major cities in early August averaged 57.8 cents per half gallon for the most common grade of whole milk. This was down 0.1 cent from July but 0.4 cent above August 1970.

Home-delivered prices: Home-delivered milk averaged 67.5 cents per half gallon in August for 25 major cities. This was up 0.2 cent from July and 2.5 cents above August a year earlier. Home-delivered prices represent list prices before deduction for quantity and other discounts.

1/ Regional and U. S. average based on prices for individual markets weighted by population. Prices are f.o.b. cities within markets on a 3.5% fat basis. Prices for Federal-order markets include over-order payments above minimum Class I prices, reported by principal producers' associations. Over-order payments may not apply to all Class I milk. Prices in this table do not represent returns to producers. Blend prices paid to producers, based on proportions used in fluid and manufactured products, are shown by markets in Table 6.

1/ Regional and U. S. average based on prices for individual markets weighted by population. Prices are f.o.b. cities within markets on a 3.5% fat basis. Prices for Federal-order markets include over-order payments above minimum Class I prices, reported by principal producers' associations. Over-order payments may not apply to all Class I milk. Prices in this table do not represent returns to producers. Blend prices paid to producers, based on proportions used in fluid and manufactured products, are shown by markets in Table 6.

NOV 8 1971

PROCUREMENT SECTION
CURRENT SERIAL RECORDS

Class I prices: The early October prices paid by dealers for milk used for fluid purposes (Class I) averaged \$7.14 per hundred-weight for about 150 markets, according to the Crop Reporting Board. This average was 3 cents above September and 16 cents above a year earlier. Gains from last month ranged from 6 cents in the New England and Mountain Regions to no change in the East North Central and East South Central Regions.

Store milk prices: Store prices to consumers in 25 major cities in early October averaged 57.9 cents per half gallon for the most common grade of whole milk. The price was unchanged from September and about 0.1 cent below a year earlier.

Home-delivered prices: Prices for home-delivered milk averaged 67.5 cents per half gallon in October for 25 major cities, 0.1 cent above September and 2.3 cents above October 1970. The home-delivered prices represent list prices before deductions for quantity and other discounts.

SALES OF FLUID DAIRY PRODUCTS AND RECEIPTS OF MILK
FROM PRODUCERS

Preliminary August sales: Preliminary data on total sales of fluid dairy products during August 1971 in 63 marketing areas (58 Federal and 5 State) averaged 1 percent above a year earlier.

July sales: Revised total sales of fluid products for July in the 63 regulated markets averaged 2 percent above a year earlier.

Whole milk sales during July were down nearly 1 percent from July 1970.

Low-fat and skim milk sales in July were up 13 percent from a year earlier and cumulative sales this year were up 10 percent from last year.

Milk and cream mixtures sales (mostly half and half) averaged nearly $4\frac{1}{2}$ percent below July 1970 but total cream sales (sweet and sour) were 6 percent above a year earlier.

Milk receipts: August receipts of milk from producers at regulated plants in 64 marketing areas (60 Federal and 4 State) were up 4 percent from a year earlier. The number of producers delivering milk to plants for these same markets was down 1 percent from August 1970.

Milk production: United States milk production in September was estimated at 9,377 million pounds, 1.1 percent more than a year earlier. September output provided 1.50 pounds of milk per person daily for all uses, equal to last year's supply but less than the 1.53 pounds for August. Production during the first 9 months of 1971 was 0.9 percent more than a year earlier.

1/ Regional and U. S. average based on prices for individual markets weighted by population. Prices are f.o.b. cities within markets on a 3.5% fat basis. Prices for Federal-order markets include over-order payments above minimum Class I prices, reported by principal producers' associations. Over-order payments may not apply to all Class I milk. Prices in this table do not represent returns to producers. Blend prices paid to producers, based on proportions used in fluid and manufactured products, are shown by markets in Table 6.

MILK PRICE HIGHLIGHTS

Class I prices: November prices paid by dealers for milk used for fluid purposes (Class I) averaged \$7.14 per hundredweight for about 150 markets, according to the Crop Reporting Board. This average was unchanged from the previous month, but 9 cents above November 1970. Gains over a year earlier ranged from 1 cent in the East South Central Region to 20 cents in the Pacific Region, while the Mountain Region was 2 cents lower.

Store milk prices: Store prices to consumers in 25 major cities in early November averaged 57.8 cents per half gallon for the most common grade of milk. This price was 0.1 cent lower than the previous month, but 0.1 cent higher than November 1970.

Home-delivered prices: Prices for home-delivered milk averaged 67.5 cents per half gallon in November for 25 major cities. This was unchanged from the previous month, but 2.3 cents above a year earlier. Home-delivered prices represent list prices before deductions for quantity and other discounts.

SALES OF FLUID DAIRY PRODUCTS AND RECEIPTS OF MILK FROM PRODUCERS

Preliminary September sales: Preliminary data on total sales of fluid dairy products during September in 63 marketing areas (58 Federal and 5 State) averaged 1 percent above a year earlier.

August sales: Revised total sales of fluid products in August in the 63 regulated markets averaged 1 percent above a year earlier.

Whole milk sales during August were 2 percent lower than the same month in 1970.

Low-fat and skim milk sales in August were up 11 percent from a year earlier and cumulative sales this year were up 10 percent from last year.

Milk and cream mixture sales (mostly half and half) averaged 6 percent below August 1970 while total cream sales (sweet and sour) were 2 percent above a year earlier.

Milk receipts: September receipts of milk from producers in 64 marketing areas (60 Federal and 4 State) were up 4 percent from a year earlier. The number of producers delivering milk to these same markets was down nearly 2 percent from September 1970.

Milk production: United States milk production in October was estimated at 9,389 million pounds, 1 percent more than a year earlier. October output provided 1.45 pounds of milk per person daily for all uses, the same as the October 1970 supply but less than the 1.50 pounds for September this year. Production for the first 10 months of 1971 was 1 percent more than the corresponding period in 1970.

1/ Regional and U. S. average based on prices for individual markets weighted by population. Prices are f.o.b. cities within markets on a 3.5% fat basis. Prices for Federal-order markets include over-order payments above minimum Class I prices, reported by principal producers' associations. Over-order payments may not apply to all Class I milk. Prices in this table do not represent returns to producers. Blend prices paid to producers, based on proportions used in fluid and manufactured products, are shown by markets in Table 6. 2/ Revised.

Class I prices: December prices paid by dealers for milk used for fluid purposes (Class I) averaged \$7.14 per hundredweight for about 150 markets, according to the Crop Reporting Board. This average was unchanged from the previous month, but 5 cents above December 1970. Gains over a year earlier ranged from 2 cents in the New England and the Middle Atlantic Regions to 20 cents in the Pacific Region, while the Mountain Region was 4 cents lower and the East South Central was 1 cent lower.

Store milk prices: Store prices to consumers in 25 major cities in early December averaged 57.8 cents per half gallon for the most common grade of milk. This average was the same as the previous month, but 0.2 cent higher than December 1970.

Home-delivered prices: Prices for home-delivered milk averaged 67.5 cents per half gallon in December for 25 major cities. This was unchanged from the previous month, but 2.1 cents above a year earlier. Home-delivered prices represent list prices before deductions for quantity and other discounts.

SALES OF FLUID DAIRY PRODUCTS AND RECEIPTS OF MILK FROM PRODUCERS

Preliminary October sales: Preliminary data on total sales of fluid dairy products during October in 63 marketing areas (58 Federal and 5 State) averaged 2 percent below a year earlier.

September sales: Revised total sales of fluid products in September in 63 regulated markets averaged 1 percent above a year earlier.

Whole milk sales during September were 2 percent lower than the same month in 1970.

Low-fat and skim milk sales in September were up 11 percent from a year earlier and cumulative sales this year were up 10 percent from last year.

Milk and cream mixture sales (mostly half and half) averaged 6 percent below September 1970 while total cream sales (sweet and sour) were 2 percent above a year earlier.

Milk receipts: October receipts of milk from producers in 64 marketing areas (60 Federal and 4 State) were up 4 percent from a year earlier. The number of producers delivering milk to these markets was down nearly 3 percent from October 1970.

Milk production: United States milk production on November was estimated at 8,975 million pounds, 1.5 percent more than a year earlier. November output provided 1.44 pounds of milk per person daily for all uses, slightly more than the 1.43 in November 1970, but less than the 1.45 pounds for October this year. Production for the first 11 months of 1971 was 1 percent more than the corresponding period in 1970.

Prices for Federal-order markets include over-order payments above minimum Class I prices, reported by principal producers' associations. Over-order payments may not apply to all Class I milk. Prices in this table do not represent returns to producers. Blend prices paid to producers, based on proportions used in fluid and manufactured products, are shown by markets in Table 6.
